Work Experience

Zoom

Aug 2026 – Present

Applied AI Engineer

New York, NY / Remote

- Design and deploy production AI agents for strategic customers, integrating with CRM, telephony, and knowledge systems using Python, TypeScript, and real customer data.
- Engineer voice AI experiences by tuning speech synthesis, turn-taking, and barge-in behavior across providers to meet customer requirements and real-world call patterns.
- Build evaluation frameworks using scripted tasks and adversarial scenarios to measure agent performance across resolution rate, containment, customer satisfaction, and reliability.
- Partner with Sales, Product, and Engineering to validate technical solutions, identify product gaps, and turn customer-specific implementations into reusable platform capabilities.

Aircall

Jan 2026 – May 2026

Forward Deployed Engineer

New York, NY / Hybrid

- Designed and deployed production-grade voice AI agents and autonomous workflows for 100+ SMB and enterprise customers using Python, TypeScript, REST/GraphQL APIs, webhooks, PostgreSQL, and event-driven architectures.
- Built MCP servers and AI tooling to orchestrate agent actions and integrate customer systems including HubSpot, Salesforce, Shopify, and Zendesk.
- Developed AI-powered onboarding and support workflows for outbound calling, appointment management, order status retrieval, intent-based routing, ticket generation, SMS delivery, and CRM synchronization.
- Built internal frameworks for agent simulation, E2E testing, and evaluation, reducing deployment and iteration cycles from hours to minutes while improving workflow reliability and deployment quality.

Outlier

Aug 2024 – Jan 2026

AI Coding Expert / AI Trainer

Toronto, ON / Remote

- Evaluated using LLM as a judge, RLHF, and continuous feedback loops and optimized multimodal LLM systems across real-world production use cases, focusing on reasoning quality and reliability.
- Designed, debugged, and improved AI systems across Python, Java, and Rust with a focus on reasoning quality, reliability, and scalable deployment workflows.
- Built automation agents using OpenRouter APIs to orchestrate evaluation workflows, streamline RLHF testing, and support large-scale model validation pipelines.

SOTI Inc.

May 2022 – Apr 2024

Solutions Engineer

Mississauga, ON / Hybrid

- Led 50+ enterprise POCs and technical deployments, conducting deep customer discovery and translating operational requirements into scalable cloud-based architectures and integration solutions.
- Built internal automation and integration tooling in C#, PowerShell, and SQL across MQTT, SNMP, and REST APIs on AWS, Azure, and GCP, reducing integration time by 200%.
- Integrated REST APIs and MQTT services to enable real-time communication between IoT devices and backend systems, improving monitoring response time by 35%.
- Developed secure authentication systems and diagnostics tooling using C#, ASP.NET, and SQL Server, reducing customer triage and troubleshooting time by 60%.

Education

McMaster University

Hamilton, ON

B.Eng. Software and Biomedical Engineering with Co-op

Sep 2019 – Apr 2025

Skills

Programming Languages: Python, TypeScript/JavaScript, Java, C#, SQL, Go, GraphQL

Frameworks/Libraries: React, Node.js, Express, Flask, Next.js, Angular, Spring Boot, TensorFlow, Pytest

AI Systems: AI Workflows, MCP Servers, RAG, Agent Evaluation, RLHF, Prompt Engineering, Multi-Agent Systems

Cloud & Infrastructure: AWS, Azure, Docker, Terraform, PostgreSQL, MongoDB, MySQL, Datadog, GitHub Actions, Linux

Integrations & Concepts: REST APIs, GraphQL APIs, Webhooks, Event-Driven Architectures, CI/CD, CRM Integrations

Tools: Zapier, Make, n8n, Workato, Claude Code, Cursor

Certifications: Microsoft Certified: Azure Fundamentals, Google Advanced Data Analytics, Salesforce Essential Training
